CHECKMATE  **the class
of '74**

Class . . . is built into every boat that bears the Checkmate name.

Our boats are constructed from the finest materials available. All hulls are built by the slow, expensive hand lay-up method. Dedicated workmen painstakingly lay in place layers of glass, cloth, balsa, plywood and glassmat to achieve the toughest hull possible.

And you can bet every hull design in this catalog has been thoroughly proven in hard fought competition.

Checkmate **is** the Class of '74.
