Blitz	Brian	83	V-King	Mariner	V6	175	CLE		2"	28" Yamaha			I am the third owner, having purchased this rig from my brother. After 10 years of continuous use, I am currently in the process of a complete restoration of the hull. The floor was getting a little weak and the gel-coat was badly faded, so I opted to take it all the way down and give it a total make-over. It's ready now for the new paint (5-color custom). Updates include a glass-in plate for the foot throttle, new gauge package mounted in a custom laser-engraved dash panel, and a hydraulic jack plate. A GREAT all-boat with just enough to "play" with the boat!

Rasham	Mia	82	Viking	Evinrude/John	235/200	235/200		4"	32" cleaver 28" chopper			Ordered from factory without transom holes, but later further apart, seems to eliminate cracking at the end of transom. It seems to handle the heavy motor/prop. Boat is in original condition otherwise. Paint job was special ordered from the factory. It's solid blue with hockey stick shaped stripes that are incrustored metal flake.
Bernard	Jeremy	84	V King	Mercury	2.4 Mod VP	260	CLE	8"	28" Merc chopper			
Cheamer 315 Radar	Larry	74	Hucker	Yamaha		50						I've had the boat since it was new. Changed from a 200 Merc to the Opti 225 in 2000. Customized the interior in 1999. The motor, transom, lower unit etc. have always been stock. With the 200. Clockd on Radar 8.78, with the 225, GPS @ 81. 90 would be nice, but 80 works for me. By far the best handling rough water boat I have ever been in! I would not suggest the OPTI, the fuel economy is amazing but it is a very quiet motor that can be run no higher than 6000 RPM's. It's also very, very heavy. I'd like to put a 225 PRO-MAX on it some day.

Cobb	John	83	Voyager V	Johnson		200	Stock	8"	23" Quicksilver 2		Jackplate.	New interior thanks to Lakes Area Boat works of Chicago City, Ill. The boat set for 10 years and was stripped by thieves. The hull was purchased for a unreal price of \$5. Back to taken some time to find the right parts to restore but its close to the final finishing.

Olson	Chris		Ventura II	OMC								This hull is still in restoration along with my wifes w/m/m. I'll get both hulls and register them. I had a Vulture that the guy I sold it to said he GPS'd it at 82, that I restored and shouldn't have gotten rid of that if I set back 26 inch chopper on an early eighties evinrude 200. That was a nice fun ride.
Olson	Dan	78	Victor	Mercury		140					Jackplate, 8" setback, hot foot, wheel controls, 12 carbon fuel cell.	Used for fishing and fast boating for 7 years. Moved passenger seat up next to drivers seat. immaculately maintained. 88 mph top speed with bone stock. 2.4 200. Should have never sold it.

Schock	Jay	76	Viper	Mercury		115	Stock					I purchase this boat 2 years ago from a family friend. Since then I have restored the interior, rebuilt and recovered the original seats. I stripped the boat down and repainted it black and gave it a candy apple red flame job. I also replaced the broken windshield and installed a vinyl ruber. The original straight 6 115 merc runs perfectly. Next on the agenda is a gun plate, low water pickup and a hotfoot to see if I can get some more performance out of it. As it sits the speedo shows around 65, but I have not had a chance to get a radar or GPS reading.

I've run this motor with the injection set at 100 to 1 for several years using Klutz. I have nearly 400 hours on this motor. It is still running fine with a self imposed limit of 8600rpm. With the 26 H-5, I can still pull skiers and it SO EASY to drive. With 3 blade props, I would get blisters from the steering torque. I have Ride-Guide Synchro sided dual-cable steering.

Custom built this boat myself. I found the hull in Canada for \$240. It had never been wet and a wax company used it to test their products on. I then contacted John @ HydroStream and had him lay up a deck for me. I went and picked it up and finished the boat in my garage with the help of my father. We balas coral and vacuum bagged it, etc. Current best speed is 60mph, and we haven't found the perfect prop yet.

Grigg	Jerry	79	Viper	Johnson '92	V4	140	Bob's nose cone w/ LWP		Chopper		Center steering, inline seats (2), dual steering, 12 gal Alum. Fuel tank, hotfoot, L & R jackplate, stringers on the floor, inline fuel separator.	This boat was purchased for the sum of \$350, including trailer, three yrs. and \$7,000 dollars later it is a very nice rig to put on the water. This money includes new trailer w/ alum. rims, and all the boat accessories, plus painting. I'm also running the original transom and windshield. The windshield really completes this boat in my opinion.

Hull has had the core done, new transom and floor installed by myself and with using Epoxy resin. marine plywood and guidance form this and other websites. Plan on dealing the bottom and deck this winter. The boat is rigged with dual Ride glide hot foot and CMC hyd. jack plate. I run a small sized merc 235hp chopper. I have tried a Ron-Hi 28inch Yamaha copy but found the chopper gets the hull on the pad better. Ben running the prop shaft center line 3/4 of an inch below the pad with the jack full up plan on changing this to 3/4 of above the pad after the bottom is done. The engine is pretty much a stock CMC 235hp (235) x-flow with the following add ons, Land and sea LWP, cone, solid mounts, V-stacks, Bob's cavitation plate and Holley blue fuel pump. With inject 230lbs my wife 177lbs full load fuel 18gals, dog 10lbs Pom and all the the needed DMR required equipment plus a cooler of beer this setup will turn the chopper a wide open throttle at 6800 rpm.
